PLACE ACQUIRED

THIS IS UNEVALUATED INFORMATION

50X1

1. The POL dump near Milovice N 50-14, E 14-547 was actually located much nearer to Benatecka Vrutice than to Milovice. The nearest railroad facilities to this POL dump consisted of a railroad siding, just west of the town of Milovice and about 1.5 km. away. The POL dump was located inside an area known as Camp No. 1 (Prvni tabor) and was about 500 m. east of Benatecka Vrutice, north of the road running between Benatecka Vrutice and Milovice. See Annex for location of the POL dump, roads, etc.
2. The POL dump was marked with 10 to 15 ventilation pipes protruding from the earth over a wide area. All other facilities were underground. There were three entrances to the POL dump area, with two guards on duty at each gate during the daytime and three at night. I have no idea of the capacity of each underground tank.
3. POL tank trucks from the military installations in the Milovice area came here and loaded with fuel.

50X1

The tanks were mounted on Tatra 111 trucks. For each battalion one of the four trucks carried gasoline while the other three carried diesel fuel (nafta) to supply the half-tracks and tanks in the unit. the capacity of the tanks, but they were oval-shaped and all the same size, about 3 m. long, 1½ to 2 m. wide, and about 1½ m. high. Cautions against smoking in the vicinity were stencilled on the tanks.) Other vehicles refueled directly from a surface gas pump in the immediate vicinity. from various indications such as the fact that the POL tank trucks were from units of the nearby 3rd Tank Div., diesel fuel (nafta) and gasoline (benzin) were stored at this dump. the fuel came from, but in three railroad tank cars standing at the railroad siding
